[Date]

- All accounts at CHMPR are set up under a principal investigator (PI). A PI must ordinarily be a regular UMBC faculty member. All accounts for members of research groups must be sponsored by a PI.
- Each applicant should have an appropriate Role in Research Project.
- All projects using the facility must submit a title and abstract to be posted in the list of projects using this machine.
Please supply title, abstract, and list of people affiliated with the project below.
- The goal of CHMPR is to direct users to the most appropriate resource available at UMBC. To this end, it is important for us to understand your needs and plans.
- Please explain your computational needs and expected level of usage of yourself and members of your research group. We ask these questions in order to plan the usage of the machine as well as possible and to inform you if this is not the right machine or its available space is not suitable for your needs. Some sample questions are mentioned below.

The Center for Hybrid Multicore Productivity Research (CHMPR)

Name

Email ID

Alternate E-Mail Address:

Phone Number

Position Title:

Department/Unit:

Affiliation/Company:

Address:

Title of Research Project:

Abstract:

principal investigator (PI):

Your Role in Research Project:

How long does your code run?

How much memory does your code require?

How much disk space will you need to store data and results?

Comments: Please use this field for comments or special requests for your account that do not fit into any other category.

The Center for Hybrid Multicore Productivity Research (CHMPR)

This facility is a shared resource and relies on all users to be communicative, to be responsible users, to adhere to the usage rules, and to help maintain and expand this facility. I have read and agree to the usage rules in effect currently as well as at any time in the future. I understand that the usage rules need to be modified over time in response to developments and usage patterns.
