8 X 12 X 12 Qubit

"Washington" Processor

The Most Advanced Quantum Computer in the world

Source Wikipedia and D-wave

Limited Access to the D-Wave 2X at AMES Research Center at NASA.

D-Wave Two is the second commercially available quantum computer developed by Canadian company D-Wave Systems. The computers are not general purpose, but rather are designed for quantum annealing.

D-Wave Two X boasts a CPU of approximately 1152 qubits.
